

Beyond Blood Sugar: Diabetes, Prediabetes, and Your Brain Health

Patty Potratz, RN, CDCES
Aurora Health Care Summit

DESCRIPTION

Diabetes is more than a blood sugar condition—it's a major factor in long-term cognitive health. This session covers the basics of diabetes and prediabetes, including diagnosis, treatment, and associated health risks. We will also highlight the emerging link between diabetes and dementia and discuss actionable steps to reduce risk and support both physical and brain health.

Monday, July 27, 2026 | 1-2pm

Holz Pavilion Theater

314 East Village Court, Dousman, WI 53118

This is a free, in-person talk hosted by Three Pillars Senior Living Communities as a part of their Brain Health Group Meetings. Event is open to the public. Registration is appreciated but not required (Residents can sign up in the portal). No virtual option will be available.
